6. Procedure 5
7. References 6
8. Associated Documentation 6

1. Background

1.1. New Anaesthetic Drug Trolley standards developed as an action from Datix report IR57172

2. Purpose

2.1. The Standard Operating Procedure (SOP) has been written to:

- Define the standards for anaesthetic drug trolley used in the Endoscopy Unit NDDH, following a Serious Incident Requiring Investigation (SIRI), as outlined in Section 1.
- Support organisation learning from the incident and subsequent investigation.
- Prevent future incidents, by improving the organisation anaesthetic drug trolley, thus reducing the risk of the mis-selection of injections.

3. Scope

3.1. This Standard Operating Procedure (SOP) relates to the following staff groups who may be involved in setting up, checking, maintaining and auditing anaesthetic drug trolley:

- Registered Operating Department Practitioners
- Student Operating Department Practitioners working as part of their undergraduate training programme, working within their current competencies.

4. Location

4.1. This Standard Operating Procedure has been agreed to be implemented in the following settings:

- Gemini Suite / Endoscopy Unit, Level 0, NDDH

4.2. Operating Department Practitioners working to this Standard Operating Procedure must be able to demonstrate continued competence as per the organisations policy on assessing and maintaining competence.

5 Equipment

- Endoscopy Unit Anaesthetic Drug trolley
- Endoscopy Unit Anaesthetic Drug trolley storage drawers (colours as below) and clear dividers:
  - Red - emergency/ essential injectable medicines
  - Blue -(1) - regularly used / standard injectable medicines
  - Blue – (2) – consumables- syringes, needles and drug labels
  - Blue – (3) – additional injectable medicines that may be required during endoscopy procedure
  - Clear – equipment required during procedures
- Injection Trays to be used for prepared injectable medicines, prior to administration.
  - Lilac Tray = Vasopressors
  - Blue Tray = everything else (all other intravenous syringes)
- In addition to the equipment listed above, each anaesthetic drug trolley will have an absorbent pad laid on the top of the trolley and will have a disposal bag and sharp bin attached, for the safe disposal of sharps and other waste, as used during the procedure.

6 Procedure

- Endoscopy Unit Anaesthetic Drug Trolley in the location specified in Section 4 are arranged and organised according to the specification set out in Appendix 1.
- In addition to the layout and stock set out in Appendix 1, smaller colour coded injection trays will be placed on top of the anaesthetic drug trolley, ready for the practitioner to place prepared, labelled injections prior to administration as follows:
  - Lilac tray = vasopressors
  - Blue tray = everything else (essentially all intravenous syringes)
- At the end of the list, the endoscopy anaesthetic drug trolley will be cleaned, checked, tidied, and ready for re-stocking.
- It is the responsibility of the operating Department Practitioner (ODP) to re-stock each endoscopy anaesthetic drug trolley, ready for the next list.

7 Review

7.1 This is the first version of the standard Operating Procedure to be produced following the incident.

7.2 Clinical Governance Lead for Anaesthetics may wish to review and rearrange the trolley/ trays, but will ensure standardisation across all NDHT Theatres and Endoscopy Unit.

7.3 Any changes will be included in an updated version of the SOP, which will be communicated to all OPS's working in the Endoscopy Unit, via departmental governance meetings.

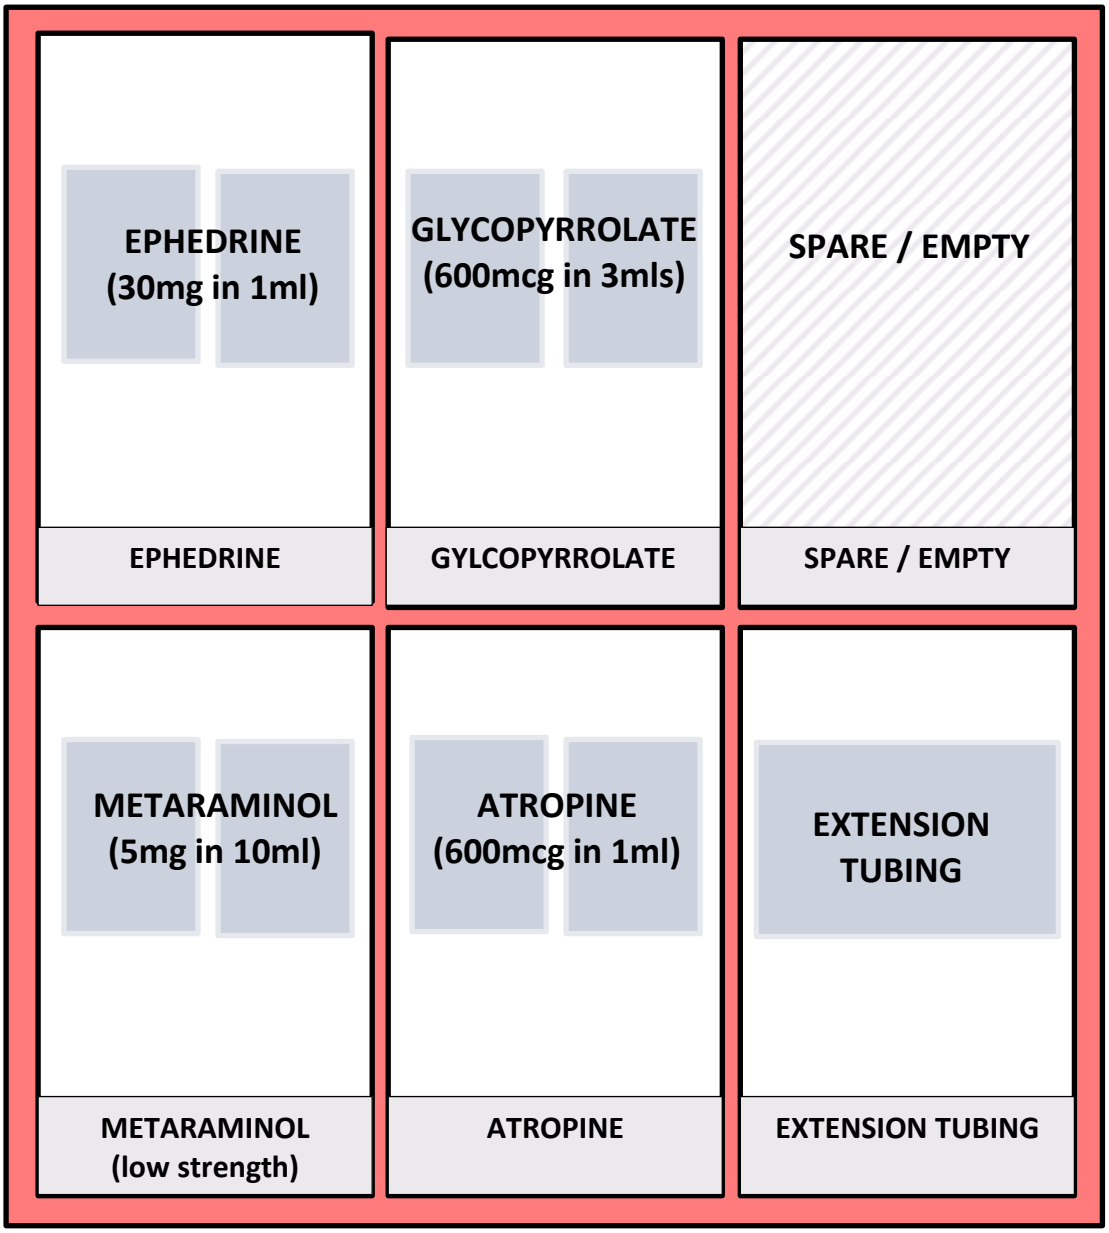
Appendix 1: Standardised Endoscopy Anaesthetic Theatre Trolley specification

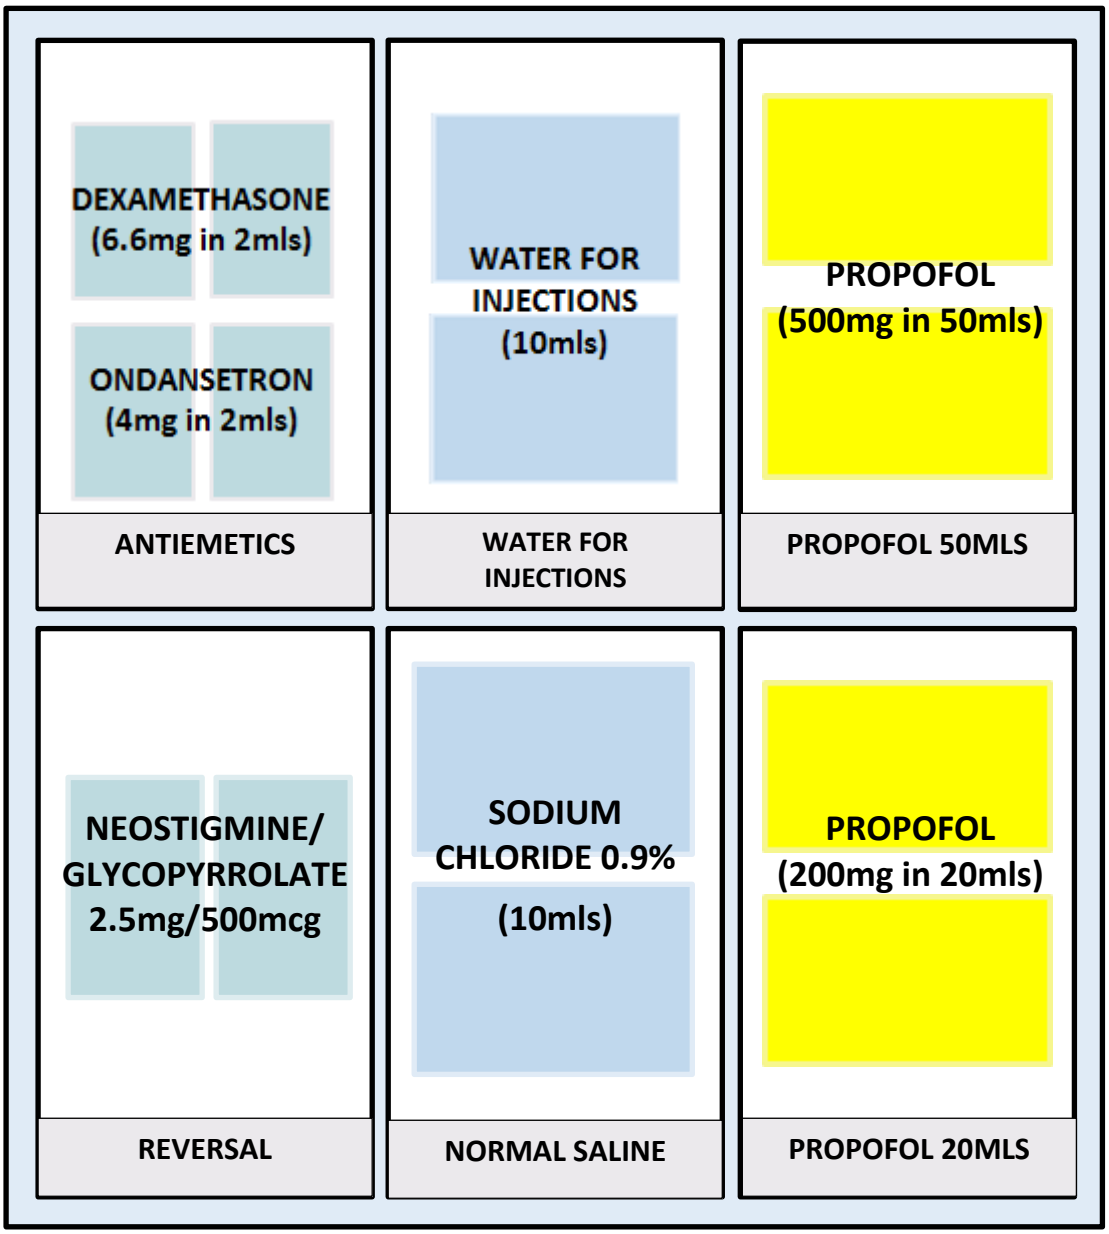
RED Top Drawer (Emergency / Essential Injections)

Individual compartments are labelled (highlighted in grey), to show where which injection is stored.

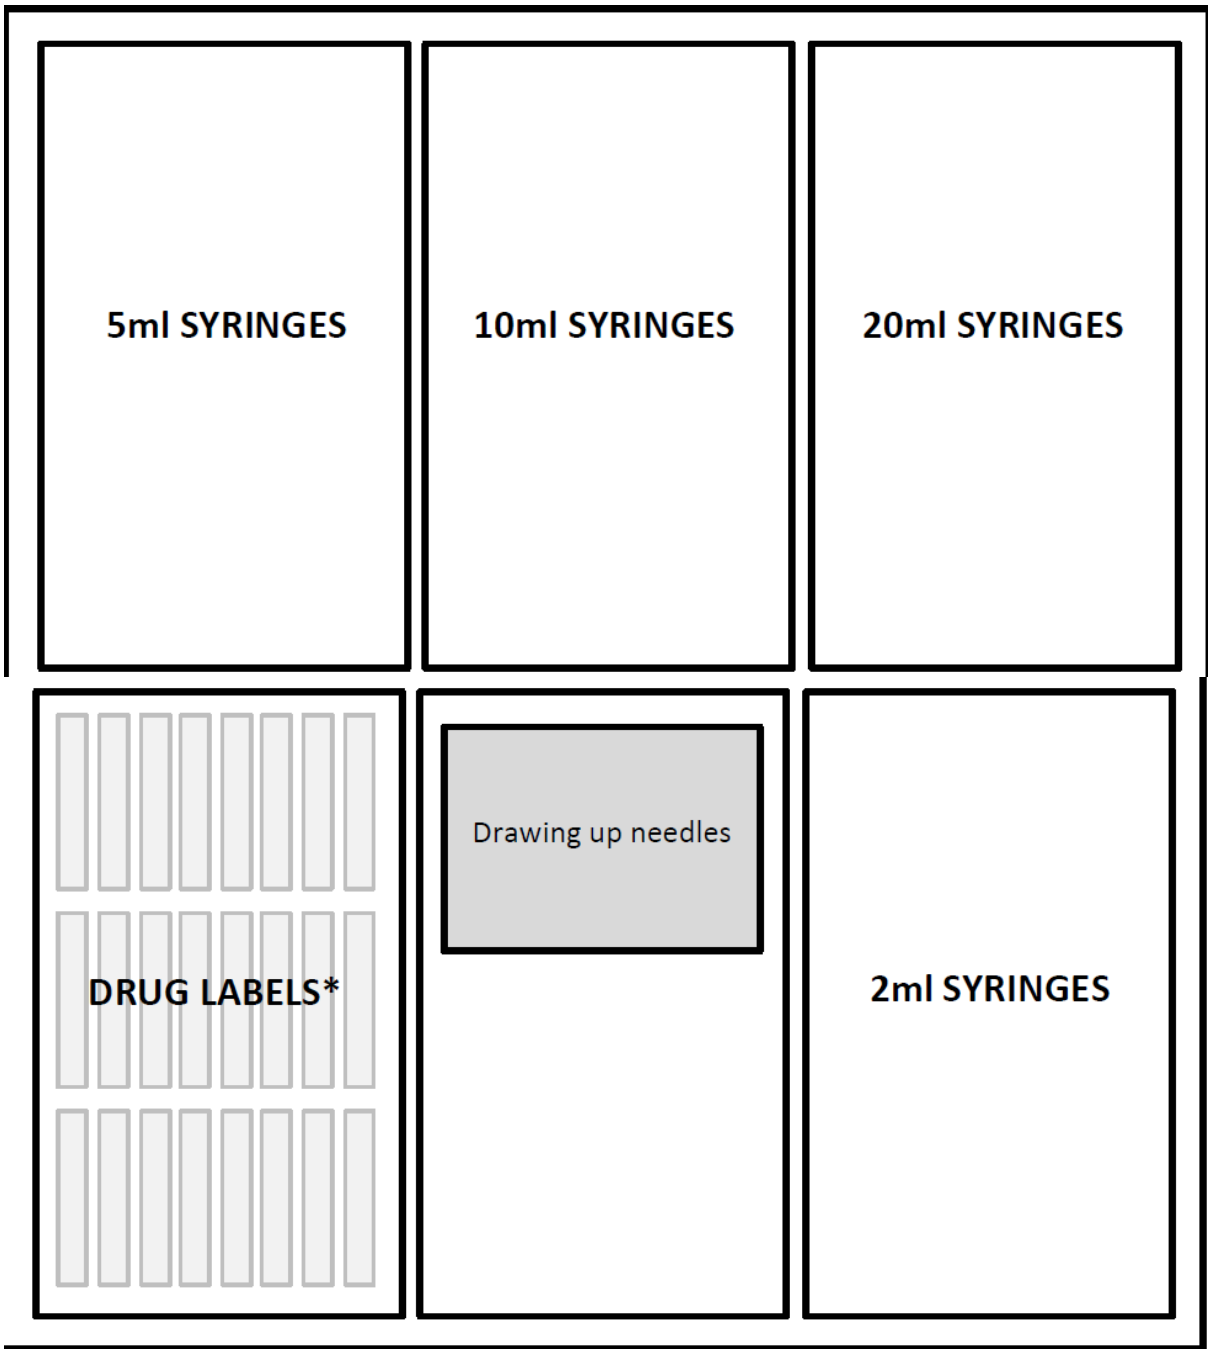


BLUE Second Drawer (Regularly used / standard injections)

Individual compartments are labelled (highlighted in grey), to show where which injection is stored



BLUE Third Drawer – Consumables

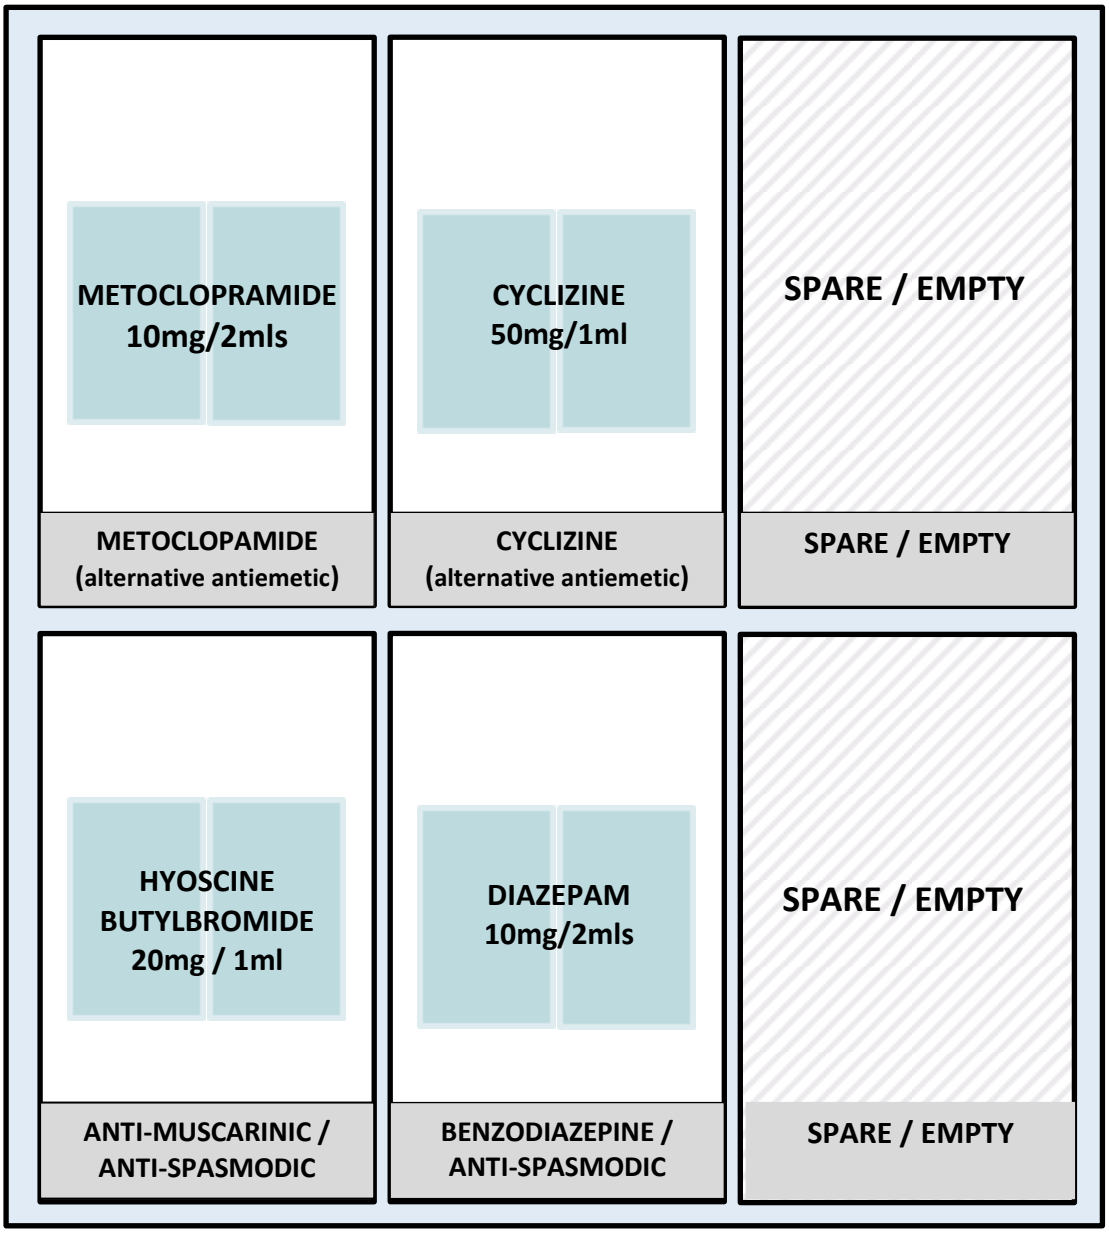


***Drug labels for trolley:**

- Fentanyl
- Glycopyrrolate
- Atropine
- Metaraminol
- Ephedrine
- Reversal
- Ondansetron
- Dexamethasone
- Midazolam
- Atracurium
- Suxamethonium
- 0.9% NaCl (Sodium chloride 0.9%)

CLEAR Fourth Drawer – Equipment

SPARE / EMPTY	SPARE / EMPTY	SPARE / EMPTY
THERMOMETER	NERVE STIMULATOR	50ml SYRINGES

BLUE Fifth Drawer (Other standard injections, Endoscopy Unit specific)


Individual compartments are labelled (highlighted in grey), to show where which injection is stored
