CARDIAC TELEMETRY CARE PLAN

NO

Date: DD/MM/YYYY

Problem: ..... is at risk of a cardiac arrhythmia and requires continuous cardiac monitoring.

Goal/objective: To identify arrhythmias and ensure appropriate immediate action is taken.

Review Date: DD/MM/YYYY

Care Planned:

- Explain to the patient the medical reason for why telemetry monitoring is required.
- Explain to the patient the areas in which they can mobilise to ensure they do not go out of range.
- This may need to be restricted according to the patient's potential/actual rhythm, please check with medics. (The telemetry range extends to the oasis restaurant and medical wards with the exclusion of Clyst, Creedy, Tavy and the end bays of Yarty)
- Ensure patients are aware of need to inform staff of their whereabouts if going of the ward.
- Explain to the patient how to initiate the recording of a rhythm strip by pressing the nurse call button located on the telemetry box.
- Alternative cardiac monitoring is required if the patient goes for tests out of telemetry range i.e. radiology, surgery.
- Ensure batteries are charged by pressing the tick button on the telemetry box at lease twice daily, replace batteries if battery level is low or flat. (x2 AA batteries)
- Electrodes to checked and changed appropriately and if any skin irritations noted medics informed and alternative electrodes sourced from cardiology.
- Daily ECG and review by medics unless medical staff advise otherwise.
- Daily review of need for telemetry by ward medics.
- Monitored cardiac rhythm to be checked by ward nursing staff at least twice daily with CCU staff and document in the CID.
- CCU staff to be informed of relevant changes in patient condition/treatment i.e. resuscitation status, awaiting procedures.
- If patients are moved to another ward CCU staff must be informed immediately.
  When telemetry monitoring is no longer required please ensure the telemetry box is return to CCU immediately, all relevant documentation obtained from CCU and filed in the CID.
