1. Background

1.1. Patient information is an important part of achieving active participation in care and self-management. It also supports a culture for shared decision making. This information should be both oral and written information in a range of formats. This SOP standardises the written information that patients, having elective surgery, should receive.

2. Purpose

2.1. The Standard Operating Procedure (SOP) has been written to:

- Identify the procedure for issuing patient information literature prior to surgery.
- Improve patient experience. Assisting in the process of achieving informed consent. Ensure equality through consistency of process, so that all patients, regardless of pathway, receive the same level of patient information literature...

3. Scope

3.1. This Standard Operating Procedure (SOP) relates to the following staff groups who may be involved in the assessment and delivery of patient information.

- Booked admission
- Communications
- Clinical Lead Pre op assessment
- Pre op assessment staff

3.2. Inpatient Paediatric, Ophthalmology and Gynaecology patient groups are excluded from the scope of this document.

4. Location

4.1. This Standard Operating Procedure is for patient information management. Can be implemented in all the pre op planning areas. Including outpatients, booked admissions and pre op assessment.

4.2. Staff undertaking this procedure must be able to demonstrate continued awareness of departmental policy and maintaining consistency.

5. Equipment

- Patient information
- Storage space

6. Procedure

6.1. Who and where the information is delivered

- All patients that are listed for surgery will initially come through one of two routes. Following this the patients will either be seen in a Pre op assessment clinic or have a telephone call from the pre op assessment clinic. Patients having local anaesthetics that are not on blood thinners will not have a pre assessment appointment (with the exception of hernias under local anaesthetics, these will be treated as inpatients)
- For patients having local procedures that do not require pre op assessment the Booked admissions team will send out patient information with the TCI (to come in) letter. ”
- For patients having their procedures under a local anaesthetic that require a telephone pre op assessment, the Pre op Coordinator will issue the patient information leaflets at triaging.
- All patients that are having telephone pre op assessments, booked by the booked admissions team, will have patient information sent out with the TCI letter. This patient group will mainly consist of elective dental and paediatric, and patients listed at peripheral sites.
- All patients having a face to face pre op assessment will receive their patient information leaflets at the time of the pre op by the pre op assessment nurse.
- In a small number of cases where admission is being organised at very short notice, there will not be an opportunity to send paperwork to the patient. In these instances the booking officer will alert the admitting area to ensure appropriate information is given to the patient on admission.

INFORMATION LIST

- All adults having a procedure under a local anaesthetic will receive “Having your operation under a local anaesthetic” and “Welcome to the Day Surgery Unit.” A procedure specific leaflet will be issued if requested and approved by the appropriate surgical lead clinician.

- All Day case adults: (with exception patients having LAs or surgery on the shoulder, arm or hand) will have " Welcome to the Day Surgery Unit" " You and your anaesthetic" "Deep Vein Thrombosis and Pulmonary Embolism" and a procedure specific leaflet as above
- All inpatient Adult :(with exception hip and knee replacements and surgery on the shoulder, arm or hand) will receive "Coming into hospital: Your stay at North Devon District Hospital" "You and your anaesthetic" "Deep Vein Thrombosis and Pulmonary Embolism" "About MRSA" and procedure specific as above.
- All Hip and knee replacements: " Patient Guide for knee or hips Before, during and after joint replacement" "Anaesthetic choices for hip or knee replacement" " Improving your experience of joint replacement"
- All Adults having shoulder, arm and hand operations: "Welcome to the Day Surgery Unit" (or Coming into hospital: Your stay at North Devon District Hospital") "Nerve blocks for surgery on the shoulder, arm or hand," "Deep Vein Thrombosis and Pulmonary Embolism" " and a procedure specific leaflet as above.
- All Day case Children: "Your Childs general anaesthetic" "Helping your child cope with pain"
- All female children between 12-18 years of age: In addition to "Your Childs general anaesthetic" "Helping your child cope with pain", will be posted "Anaesthesia during pregnancy." This will be sent by the pre op nurse after the pre op assessment. During the pre op assessment the nurse will sensitively explain the requirements for this leaflet. This leaflet should be explained to the parent at the time of the pre op assessment and posted out C/O parent following their pre op assessment and prior to the child's hospital admission
