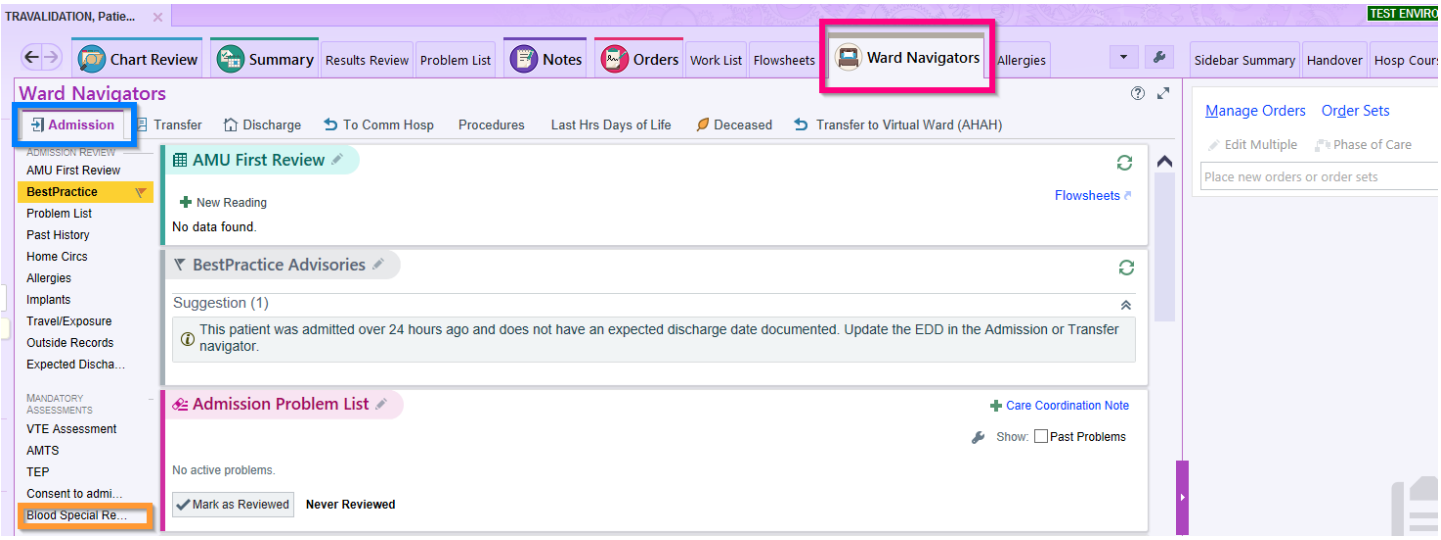
Blood Transfusion – Blood Special Requirements

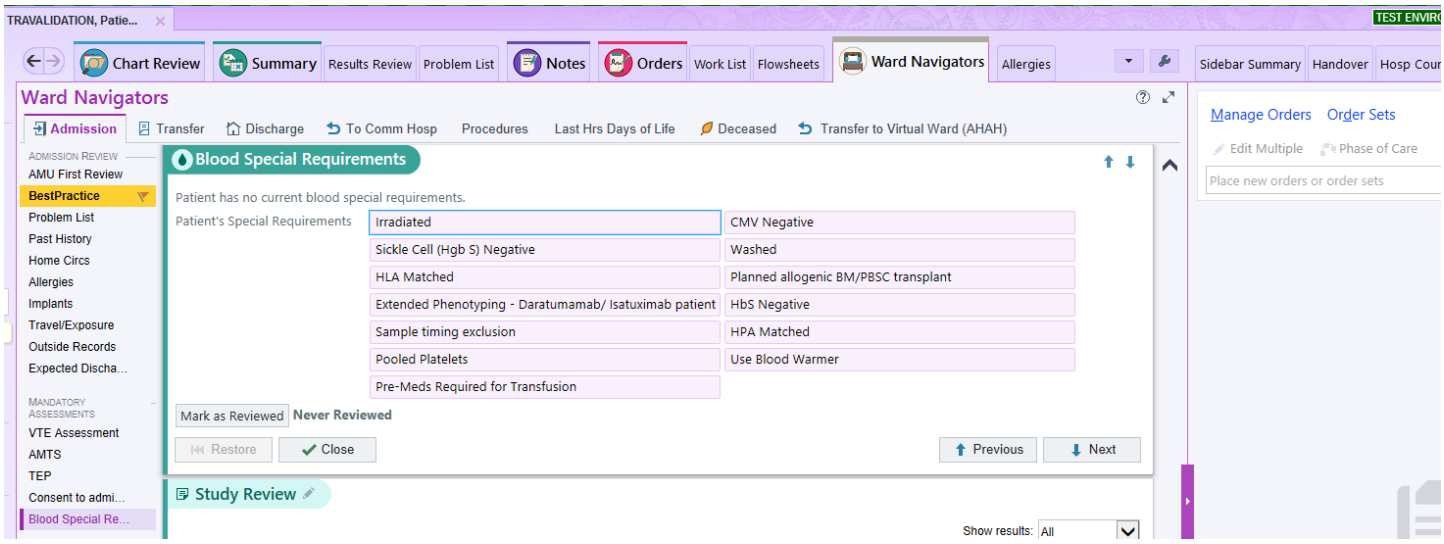
For use in documenting and notifying the Transfusion Lab when a patient requires special blood components/products. With MyCare, special requirements should be documented via the **Doctors Admission Navigator.**

Documenting Special Requirements in the Patient's Record

Go to the **Ward Navigators Activity** and Select the **Admission Navigator**:

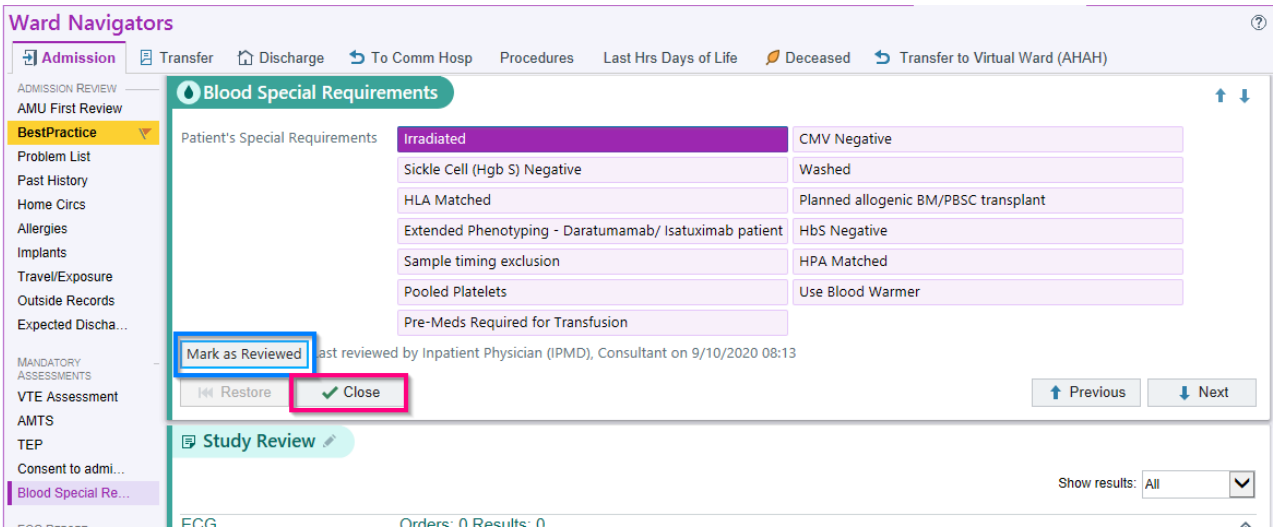


Click **Blood Special Requirements** section, located under **Mandatory Assessments:**



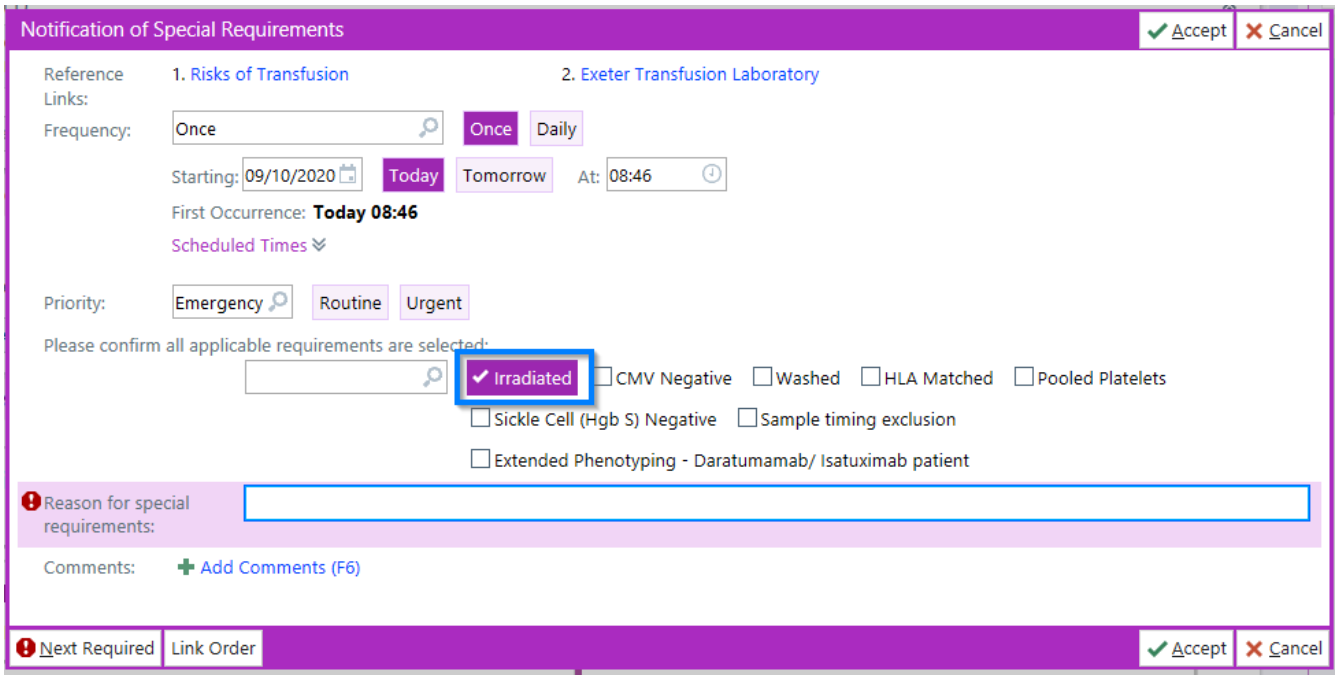
Use the Blood Special Requirements Smart Form to document the special blood components/products the patient requires.

Click '**Mark as Reviewed**' to record the time/date and your name as the clinician who recorded the special requirements – Click **Close.**

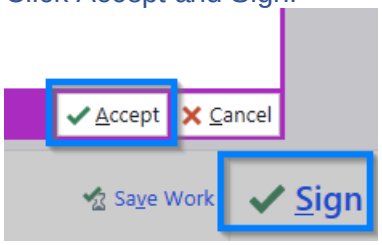


Click the **BestPractice** section – you will see a BestPractice Advisory which will generate your Notification of Special Requirements order. Click **Accept:**

This will generate your Notification of Special Requirements order. Note that you do not need to re-enter the special req – your selection from the smart form will already be selected. Document the reason for the special requirement:



Click Accept and Sign:



You will see a pop up window – **this is confirmation that a letter generation** (right-hand screenshot below) **of the patient's special requirements has been emailed to the Hospital Transfusion Team:**
NB – You will not see the letter generation; it will email straight to the HTT.

NOTIFICATION OF REQUIREMENT FOR SPECIAL BLOOD PRODUCTS

Patient Name: VERMONT,Lil **MRN:** ZA00012 **NHS Number:** Missing
Gender: Male **Date of Birth:** 14/5/2020

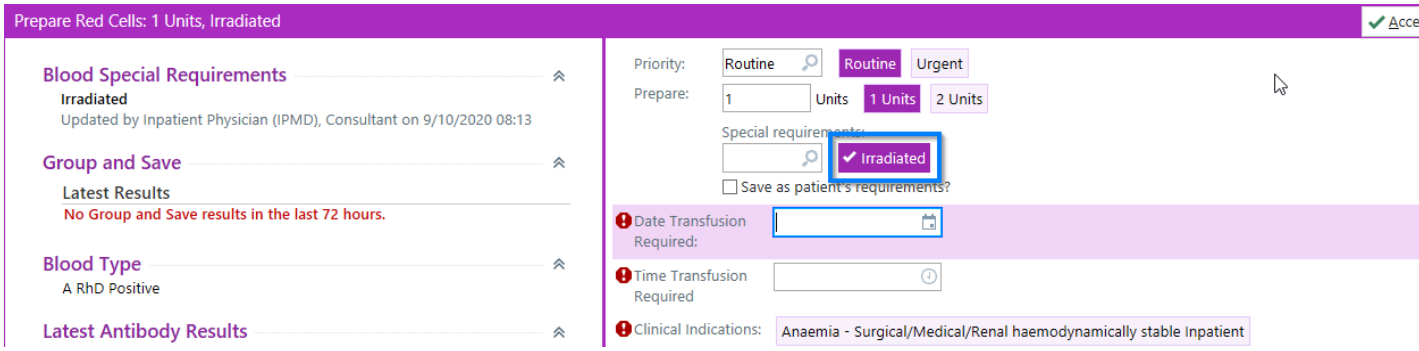
Requesting Clinician: Inpatient Physician (IPMD), Consultant
Request Date: 9 Oct 2020

Notification of Special Requirements

Please could this patient be registered on the system to receive special blood products, indicated below until otherwise notified

Requirements:
Irradiated [0]
Reason for special requirements: Patient receiving chemotherapy

When ordering blood components, the special requirements you documented will automatically appear on the requests:



You must notify the Lab if the patient's special requirements change or are no longer required. You can do this by placing another Notification of Special Requirements order. If the request is urgent, phone the Transfusion Lab.
