Blood Transfusion – Blood Sample Collection

Group and save requests are ordered through Epic.

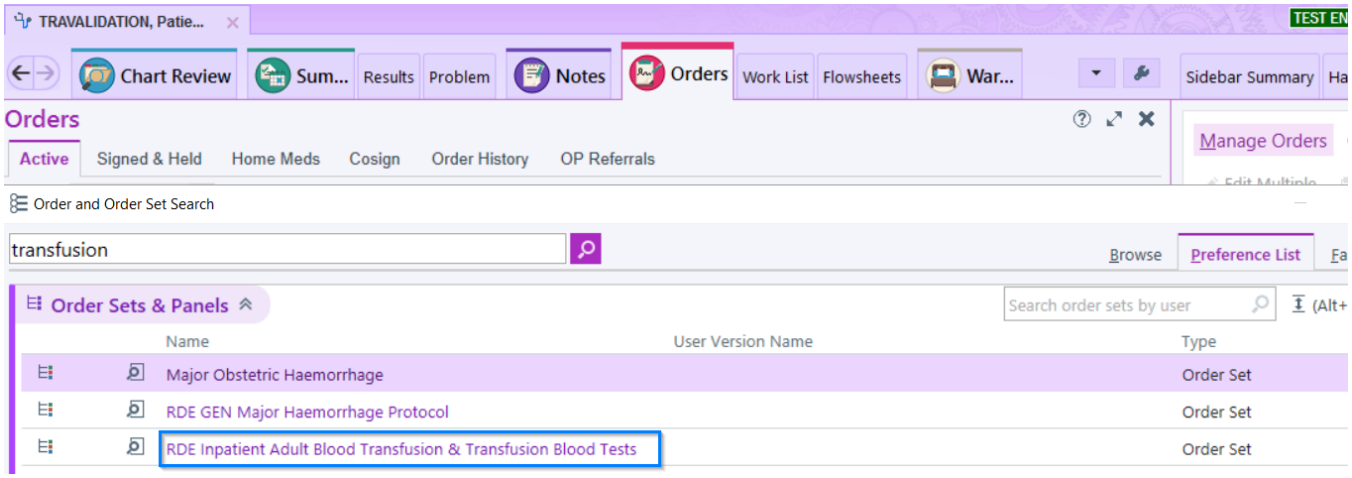
!	**BloodTrack Tx must be used to produce an on demand label at the patient's side for transfusion blood samples. BloodTrack Tx is accessed from the green bar at the top of your EPIC screen.** **Launch the Electronic Blood Tracking page here for guidance on sample collection**

Ordering a Group and Save

Group and save tests (and any additional transfusion lab tests) should be ordered using the **NDDH/ RDE GEN Routine Adult Blood Transfusion** order set.

To find the order set, go to the **Orders Activity** and search for 'transfusion' or 'blood. Select the appropriate order set:

For **inpatients,** select **NDDH/RDE Inpatient Adult Blood Transfusion & Transfusion Blood Tests**
For **outpatients,** select **NDDH/RDE Outpatient Adult Blood Transfusion & Transfusion Blood Tests**



Once you have opened the order set, you will be prompted to select your group and save request(s) dependent on the presence of a patient's historical sample:

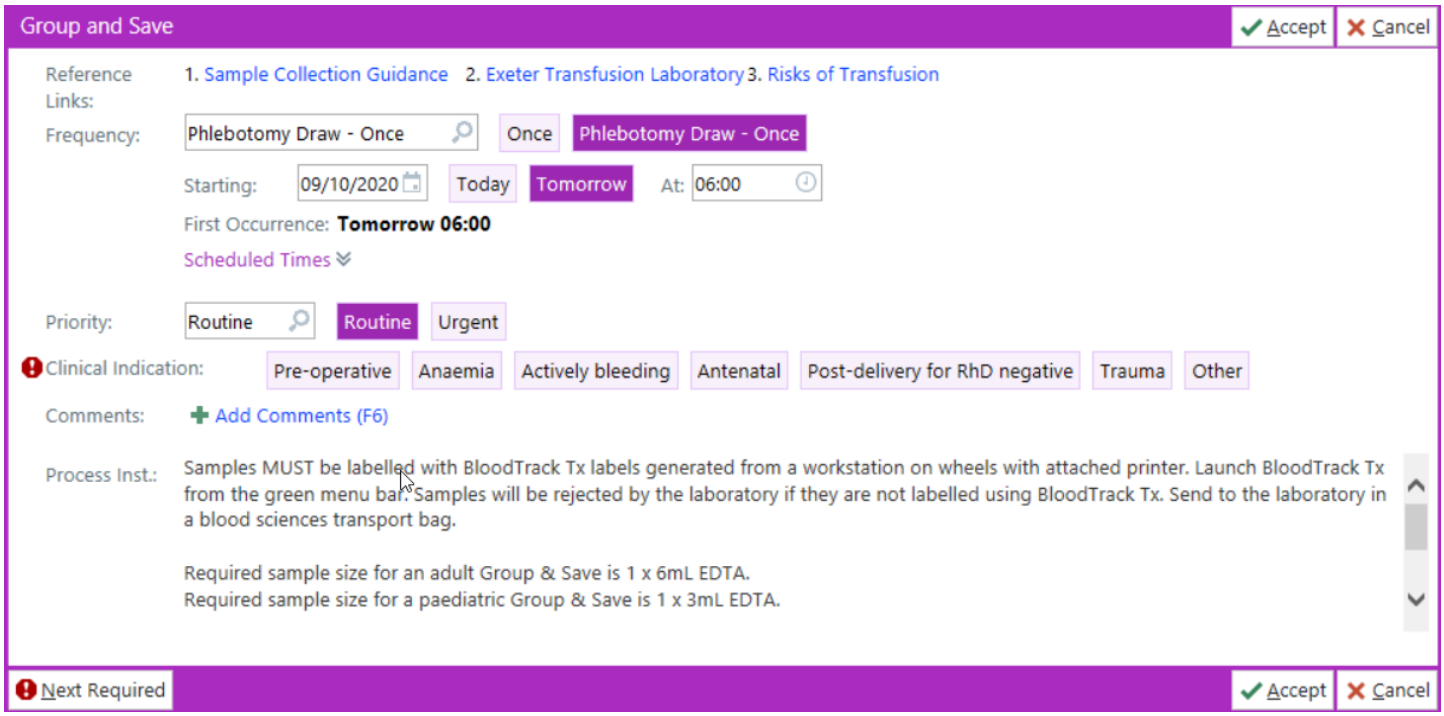
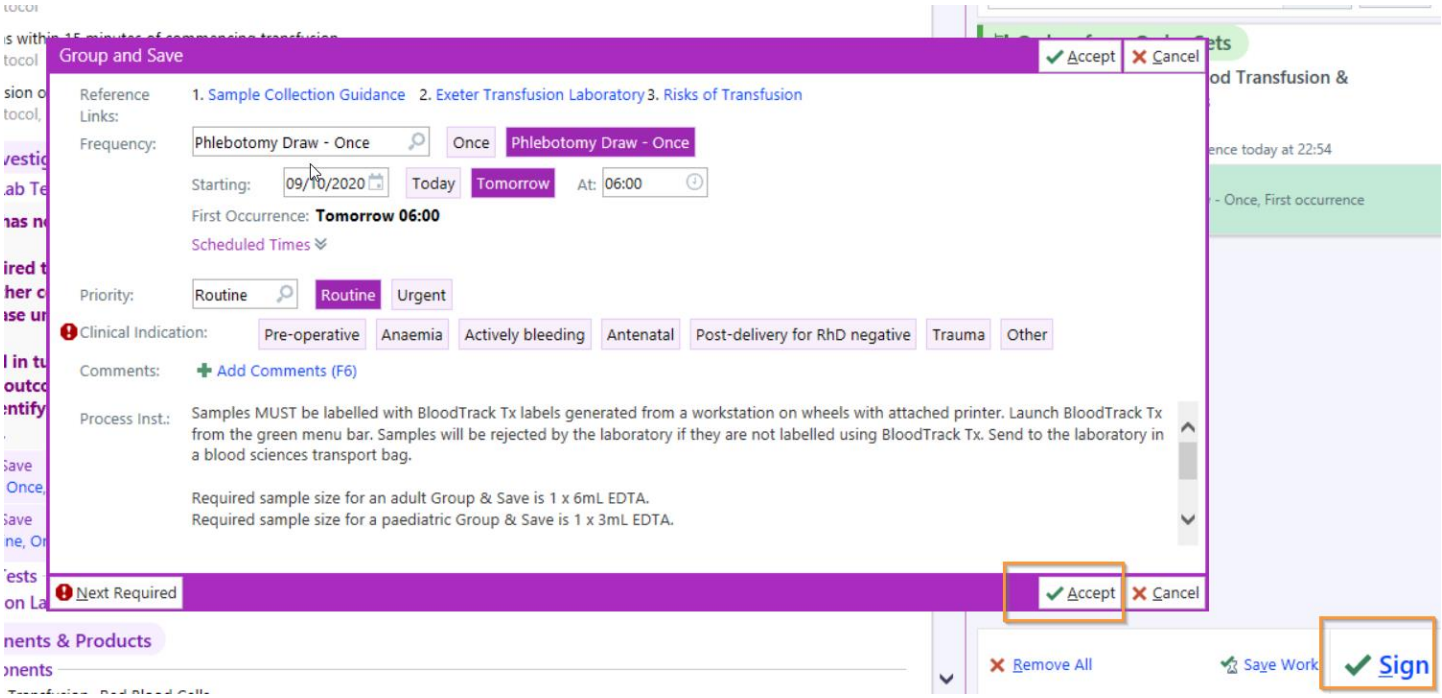
Click on the order to expand the order, and then fill out the required details on the request.

	For **Ward staff undertaking sample collection** – Select a frequency of **Once** For **Phlebotomy collection –** Select a frequency of **Phlebotomy Draw - Once**



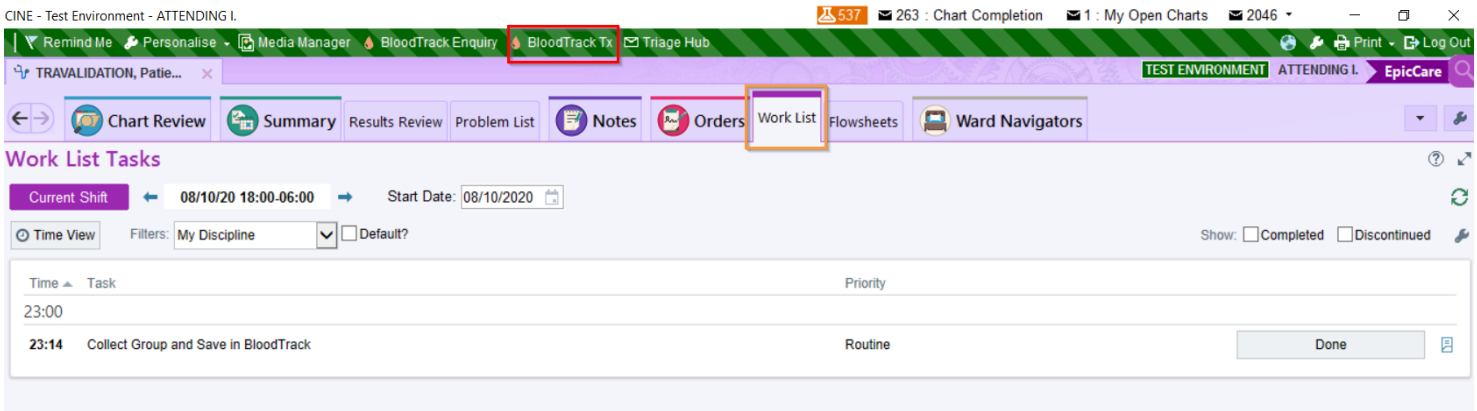
When you have completed all the required clinical indications, click accept and Sign;



ⓘ	Sample Collection guidance is accessible from the Reference Links which can be found at the top of every transfusion test.

Sample Collection

A task will appear on the Work List for patients with a group and save request which requires collection:



- Take a WOW with a printer on it to the patient's side
- **Positively identify the patient** by asking their name and date of birth where possible, and checking the wrist band details match verbal identification as well as patient details on EPIC

- Take the sample for transfusion and **stay at the patient's side**

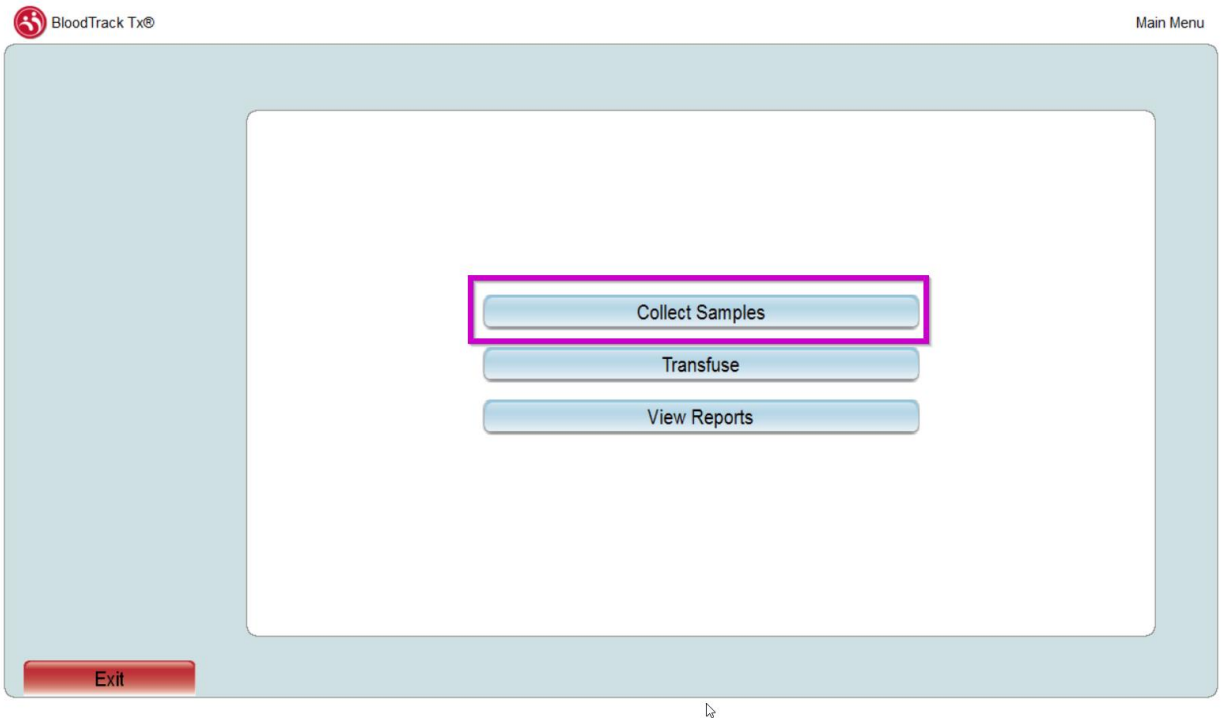
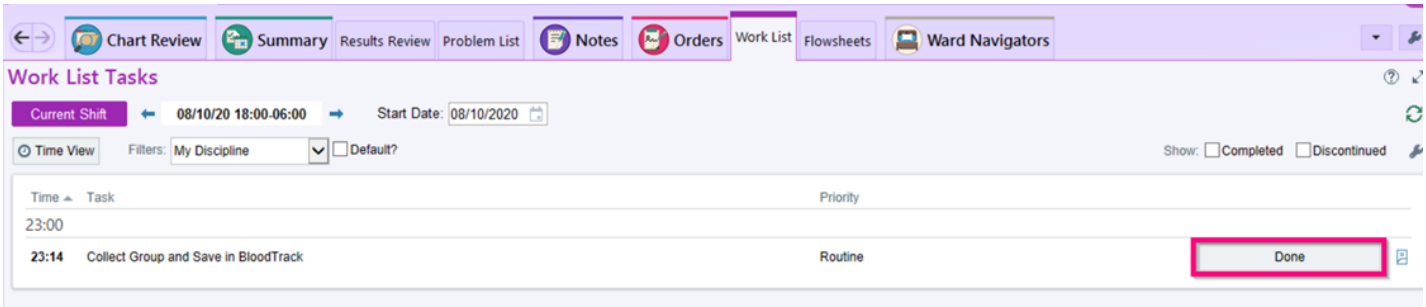
- Launch BloodTrack Tx from the green menu bar in Epic:





Follow the on screen instructions to print a label for your samples and put the sample in a specimen bag and send to the laboratory
When the sample collection is complete, click back into Epic and complete the collection request by clicking **Done** on the Work List task:
